

Ordering Mynd for Veterans at Home

Overview:

Mynd for Veterans at Home is a VR system designed to enhance overall wellness, with a focus on cognitive and mental health. It's built for independent use and leverages gaze-based, headset-only technology, allowing users to engage in self-led experiences that address anxiety, depression, pain, discomfort, and loneliness. The system offers over 100 immersive experiences rooted in clinically proven techniques, including mindfulness, relaxation, reminiscence, distraction therapy, sensory regulation, behavioral activation, and social connectedness.
